ERGOform Handles

The glassfiber-reinforced plastic material of the ERGOform Handles is successfully used in practice since 2015 with our RELAX Mouth Mirrors. The material is autoclavable, colour- and shape-stable as well as resistant against acids and plaque-indicators.

Because of the lightweight material low-fatigue work is ensured and the wider diameter in the front and especially the grip recess provide a relaxed grip. The Handles for Mouth Mirrors and Explorers are available in the same colours as the RELAX Mouth Mirrors. Thus the practice organisation can be simplified.

ERGOtouch Explorer

made out of martensite surgical steel according to EN ISO 7492 ensures a high bending strength and flexibility.

The Explorers are permanently fixed.

Autoclavable up to 134°C

ERGOform | Handles and Explorers | each

The Explorers are permanently fixed.
